

Waste to Aesthetic Decoration

Introduction

Nowadays, people use resources wastefully, causing a lot of waste plastics on the earth. In this project the waste has an effect on environment and animals. So we need to show other people how we can help other living things by recycling waste into aesthetic accessories.

Principles

Sustainability Action, we choose to make accessories with plastic bottles because at present it is convenient to get food and drinks so It is easy to get something to drink, but it is easy to create waste too. Therefore, we choose to recycle plastic bottles, one of the major waste problems in the world.

Methodology

First, Pick plastic bottle from garbage. Then Remove the plastic cover (logo). Third, Cut the bottom of plastic bottle. Fourth, Cut plastic bottle into two pieces. Fifth, Cut them into six pieces. Sixth, Burn them by fire. Seventh, Wash them. Eighth, Perforate them by heated needle. Ninth, Thread a cord into the hole. Tenth, tied a knot. And Finish!

Materials

Plastic bottles, Tab of can, Cord

Techniques

Recycle

Bring a piece of plastic bottle to burn on fire. The shape of the plastic piece will change into the organic form.

Reference

The shape of the plastic bottle after the burning process will turn into organic form which is inspired by a shell necklace. The similarity between plastic bottle necklace and shell necklace is they do not require industrial processes as they are a D.I.Y (Do It Yourself) accessories.
