

Last Wish

“If it’s the last moment of your life, who is the person you want to meet the most?”

The animation is about the elderly living alone who tries her best to accomplish her last wish until her last breath. Facing the end of her life, Chan Po Po, made her last wish and begged Death to give her one last time to have dinner with her son.

The world is aging rapidly, and Hong Kong is no exception. In recent years, there are several news reports about the elderly who died for a week before anyone noticed. Those tragic stories triggered me to make an animation about the elderly living alone. I hope they can grasp the time to show care and love to their elderly parents before it’s too late.

The Process: Scriptwriting → Character design → Storyboard → Animatic → Test animation → Sketch an Inking → Editing

Animation movement is the most difficult part for me. Therefore, I took some short videos of the movement for reference. In making this animation, I used Procreate software to draw the animation and also used Adobe After Effect to edit the animation and add sound effects.
