

## Covid season

Covid pandemic appeared to surprise the whole world, shocked and panicked.

It comes out of nature or the man who created them? No matter where they appear, their aftermath has caused millions of deaths around the world and has not stopped. During the covid pandemic the most effective thing to prevent the epidemic was the mask.

That most people in the world have not consciously used it to prevent epidemics, protect our lives and the community. The sense of community protection during the epidemic season needs to be more spread.

Works using Linocut materials, Relief print.
