

TITLE : Innovative Discovery

Introduction : Start with the BAG+SHIRT me as student want to represent the identity of my brand that was unique and being different evajfkcnwejakfhmuawejvfuwewvkl This is also the way that I use to represent the fashion brand by doing something that not considering about the rules and break the border and open the door for other people in come because huminity has been control by the rule of society for to long we don't do things that base on love or creat things that we scared and held down by other people opinion.

Concept : The concept is to be different as possible and let the human being be awesome as possible, and I also want to solve the problem that shirt and bag is the things that we need to have in every day and carrying it both outside I want to help other people have the shirt that can carry you things without using a bags so I decide to design the shirt that have a bag that stick with the shirt so you don't need to find your bag.

Process : I use the old t shirt and cut the bottom of the shirt and sew it with another shirt

Technic : reuse the old shirt and sew
