

## Sajjaporn Pakdeephuthon

1. Title: Crisis of Waste
2. Introduction: During the coronavirus pandemic, people have been producing additional waste constantly, such as; face masks and gloves, which are hazardous waste that could not be reuse or recycle. Without a proper management or disposal treatment they could harm the environment terribly.
3. Principle: "Crisis of Waste" poster set objective is to remind people and emphasizes about how their everyday routine and their recklessly could harm the environment.
4. Process:
  1. Research about covid-19 and the impact to environment
  2. Sketch
  3. Take a picture of personal protective equipment: face masks and gloves, to use as an element.
  4. Collage the pictures to combine with illustration.
5. Collage mixed with digital illustrations.
6. Waste Management during the COVID-19 Pandemic
